Take away your HR headaches!

A key component of the recruitment process is advertising your job vacancy to find the ideal candidate. Internet job advertising has proved to be the most effective in terms of reach of candidates and cost. In fact, internet job advertising has increased over 25% in the past year. There are a plethora of internet job boards ranging from the top national boards such as SEEK and CareerOne to a vast array of niche job boards that specialise in a specific industry sector.

Whether you are used to using a single internet job board or multiple job boards, there is a need to hold contracts with each job board and buy an ad package to obtain discounts.

That is a lot of time, effort and money!

Through the **PeoplePortal** site you can buy a membership and choose an ad package to suit. You can then advertise with **SEEK**, **CareerOne** and **Australian Recruiting** at any time, using our service.

That is one membership, one ad package – resulting in huge savings!!

So, if you need to advertise just once or multiple times – using Australian Recruiting's **PeoplePortal** website will help to alleviate some of your HR stresses.
